R E P O R T
OF THE WEEKEND CAMP AT THE KINDERGARTEN FLENSBURG-NEUSTADT
ON THE 18 / 19th SEPT., 1948

Ten members of the IZD groups Schleswig and Eckernförde with a new friend from Flensburg and two members of IVSP went to the Flensburg Neustadt-Kindergarten to dig, in its playground, the foundation of two sandpits 300 x 300 x 40 cm. The thus realised earth was then transported to the Kinderheim Harrislee to level the playground there. The work at Neustadt was completed and the work at Harrislee will be continued and completed in the next weekend Camp (Oct. 2/3). Owing to the extremely bad weather - it rained continuously all day Sunday, working time was reduced to 8½ hours (4 to 7,30 Saturday, 8 to 1 Sunday).

As three of the camp members were more or less new to the SCI idea the discussion on Saturday night concerned itself with the presentation of its idea. Despite it being the "old old story" older members too found the discussion helpful and invigorating. Sunday afternoon we planned a folk-dancing hour, were too tired and so had a sing-song instead. A Silent meeting on Sunday morning also helped to bring us together.

The Camp-spirit remained excellent throughout the whole weekend. Hans Kuhn very efficiently led the Camp; his sister Inge making a very good head-woman-volunteer.

Fred Deutsch
Secretary.
