d) "East-West"

Although there has unfortunately been no progress towards an "East-West" service after carrying out suggestions made by Marie Morvan at the last ISM, the Committee emphasized their desire that the French branch continue their efforts in this direction. Heinrich Carstens mentioned an invitation from a Protestant Church group in East Germany and it was read that although SCI cannot work for any one Church, branches should be notified in case any individual members are interested. A group of Leipzig students will be working again this year with the Austrian service at Blons.
